

move cord or chain 1. Furthermore, George's cord 1 is not a loop and the latch mechanism doesn't move horizontally.

The Johnson roll-up door has a locking mechanism that requires rotation for operation, unlike applicant's invention.

In view of the amendments made to the claims and the remarks presented above, please reconsider claims 9 and 10 as presenting patentably distinct definitions of applicant's invention.

Allowance of claims 9 and 10 is solicited with passage to issue.

A petition for extension of time to respond in the fifth month following the Office Action date and our check in the amount of \$200 is enclosed, however, should there be any deficiencies, please charge our Deposit Account No. 50-0897 (BOO001/135818).

Clean copies of claims 9 and 10 are attached.

Respectfully submitted,
